### **Resource Systems Group named one of the Best Places to Work in Vermont two years in a row**

White River Junction, VT (September 2007). In a repeat honor of last year's fourth-place ranking and recognition, RSG was selected as one of 2007's Best Places to Work in Vermont. This annual program was created by *Vermont Business Magazine*, the Vermont State Chamber of Commerce, the Vermont Department of Labor, the Society for Human Resource Management (SHRM)-Vermont State Council, the Vermont Department of Economic Development and Best Companies Group.

This survey and award program was designed to identify, recognize and honor the best places of employment in Vermont, benefiting the state's economy, its workforce and businesses. To be considered for participation, companies had to fulfill the following eligibility requirements:

- Be for-profit or not-for-profit
- Be publicly or privately held
- Have a facility in Vermont
- Have at least 15 employees in Vermont.

Companies from across the state entered the two-part process to determine the Best Places to Work in Vermont. The first part consisted of an evaluation of each nominated company's workplace policies, practices, philosophy, systems and demographics. The second part consisted of an employee survey to measure the employee experience. The combined scores determined the top companies. Best Companies Group managed the overall registration and survey process in Vermont with assistance from ModernThink LLC, who analyzed the data and used their expertise to determine the final rankings.

The full list of the Best Place to Work in Vermont, and how they rank, was unveiled at an awards gala on 6 November 2007. RSG was also featured in a special supplement of the November 2007 issue of *Vermont Business Magazine*.

**About RSG.** RSG specializes in planning, analysis and management of business, infrastructure and natural resources. We believe that high-quality, objective analysis is a prerequisite to resolving complex problems. More than just analysts, scientists and technicians, we're communicators—our study results are clear, concise and directly applicable to a client's particular questions and challenges. Our solutions are creative and grounded by more than 20 years of experience with clients as large as federal government agencies and FORTUNE 500 companies or as small as local interest groups and municipalities.
