FOR IMMEDIATE RELEASE

**RSG INC. IS FOUNDING REPORTER OF THE CLIMATE REGISTRY
Industry Leader Takes Action on Climate Change**

(RSG Inc., White River Junction, VT)—Resource Systems Group (RSG) Inc. has become a Founding Reporter of The Climate Registry by being among the first to join the organization. The Climate Registry is a non-profit organization established to measure and publicly report greenhouse gas emissions (GHG) in a common, accurate and transparent manner consistent across industry sectors and borders. Thirty-nine U.S. states, six Canadian provinces, three Native American tribes, two Mexican states and the District of Columbia are the founders of the organization.

“RSG has demonstrated exemplary environmental leadership by courageously stepping forward to support The Climate Registry in its preliminary stages. We are deeply grateful for their integral support in helping to address the challenge of climate change,” said Gina McCarthy, Chair of The Climate Registry.

A forerunner in providing consulting services for the management of natural resources and energy, transportation, and business, RSG has demonstrated environmental stewardship on several fronts by voluntarily committing to measure, independently verify and publicly report their GHG emissions on an annual basis using The Climate Registry General Reporting Protocol. The protocol is based on the internationally recognized GHG measurement standards of the World Resources Institute and World Business Council on Sustainability.

About The Climate Registry

Incorporated March 2007 in Washington, D.C., The Climate Registry provides accurate and transparent measurement of GHG emissions and ensures consistency of measurement metrics across industry sectors and borders. The Climate Registry accounting infrastructure supports both voluntary and regulatory programs. For more information, visit www.theclimateregistry.org.

For more than 20 years, RSG has provided insightful consulting services for the planning, analysis and management of transportation, natural resources, technology and business. Since its founding in 1986, the firm has offered high-quality, objective data analysis to serve a broad portfolio of public and private sector clients locally, regionally and nationally. With headquarters in White River Junction, VT, RSG has offices in Chicago, Burlington, Portland (ME) and Salt Lake City.
