RSG hires new Director of Burlington Office

Peter Plumeau joins RSG in Burlington, VT

White River Junction/Burlington, VT – August 2007 – RSG Inc., a consulting firm with headquarters in White River Junction, recently hired Peter Plumeau to lead its growing presence in Burlington. “Peter brings considerable transportation planning experience to RSG, and he is a great person to help foster additional growth and mentor staff in Burlington,” said Tom Adler, RSG’s President.

Mr. Plumeau specializes in facilitating enhanced transportation planning agency effectiveness through strategic planning, management analysis, and best practices applications. His experience includes developing innovative transportation initiatives and funding strategies in large and small urban areas; communicating complex issues to diverse audiences; and facilitating consensus-building among disparate parties, including legislators, agency officials, and the public. “This is a terrific time to join RSG,” says Plumeau. “The firm is already highly regarded for its transportation planning and engineering services in Vermont and throughout the country. I look forward to building on RSG’s strong reputation and working with the very capable staff in Burlington.”

Before joining RSG, Peter led the Northeast presence for a national transportation engineering and planning firm. Prior to that post, he was the Executive Director of the Chittenden County Metropolitan Planning Organization (CCMPO). “Peter brings a nice blend of local knowledge and national perspective to our transportation practice,” according to Bob Chamberlin, RSG’s Managing Director of Transportation Planning and Engineering.

About RSG Inc. – Recently recognized as the Deane C. Davis Outstanding Business of the Year in Vermont, RSG specializes in planning, analysis, and management of transportation, business, and natural resources. We believe that high-quality, objective analysis is a prerequisite to resolving complex problems. More than just analysts, scientists, and technicians, we’re communicators – our study results are clear, concise, and directly applicable to a client’s particular questions and challenges. Our solutions are creative and grounded by 20 years of experience with clients as large as federal government agencies and FORTUNE 500 companies or as small as local interest groups and municipalities.
